Virtual programs
available

Level 1 Available now	Workplace Computer Confidence Adults, job seekers, returning workers, families, and teams that need everyday computer confidence.	Two 3-hour sessions or custom intro	Workbook, quick guide, practice plan, and a realistic workplace simulation.
Level 2 Nearly ready	Workplace Productivity Foundations People who need better habits with documents, spreadsheets, cloud files, calendars, and shared work.	Half-day, full-day, small group, or coaching	Cleaner workflows, repeatable habits, and practical follow-up steps.
Level 3 Pilot-ready	Practical AI for Work Small businesses, nonprofits, freelancers, leaders, operations teams, sales, and marketing teams.	75 to 90 minutes, half day, or custom	Reusable request method, review checklist, and one role-relevant workflow.
Level 4 Custom programs available	Responsible AI for Organizations Owners, managers, HR, IT, nonprofits, associations, and teams adopting AI.	Leadership briefing, working session, or series	Information-boundary map, human-review checklist, guidance draft, or 30-day plan.

Best first step for groups

For a broad business or community audience, begin with Practical AI for Work as a 75 to 90 minute hands-on workshop. It gives participants useful examples, privacy boundaries, better request habits, and a review checklist they can use right away.

What is already built

The public site is supported by real curriculum, downloadable resources, and a working diagnostic tool. These assets help hosts and organizations see that the offer is practical and prepared.

Proof assets - Finished Level 1 curriculum with instructor guide, assessment, lesson plans, and capstone simulation - Participant-ready workbook, welcome packet, quick reference, practice files, and public class overview - AI Opportunity Map diagnostic for identifying safer starting points	Useful outputs - Downloadable public resources for computer confidence, scam safety, and shortcuts - Participant testimonial from a completed six-hour technology class - 28+ years in IT, software, systems, and applied AI work through Crouch Development
---	---

Common formats

- Community presentations and lunch-and-learns
- Small-group classes and workshops
- Leadership briefings and responsible AI working sessions
- One-on-one coaching and office hours

Responsible AI workshops are education and facilitated planning. Specialized legal, regulatory, cybersecurity, and compliance decisions belong with qualified advisors.
